First name: Chad

Last name: buckingham

Organization:

Title:

Comments: It is beyond foolish to accelerate the degradation of our environment, to then invite exploitive extraction. Which feeds and builds technologies that are obsolete before they are built to artificially reinforce monopolies which in turn reinforce standardization of cultural, technological, ecological and ontological mediocrity masquerading as exceptionalism. We need these spaces protected because honestly they are one of the few places Americans have an operational example of freedom proxy. For some the only alternative is using the restroom at work, Bit also, these wild spaces aren't really ours, but the responsibility of stewardship is.
