

Data Submitted (UTC 11): 9/30/2026 2:07:10 PM

First name: Bryan

Last name: Bash

Organization:

Title:

Comments: Please do everything you can to simultaneously protect the land from being wasted by fire from chronic poor management due to misguided but well intended policy, while also preserving the massively declining mule deer and elk population. You are protecting what us Oregonian hunters consider on of the last great places on Earth and the most coveted and cherished hunting areas in our state and country. Please proceed with the utmost caution! This feels like all we have left.
