Comments: The Blue Mt. Forest Plan has been a very well crafted plan and has proven to be effective in addressing vital management issues and challenges regarding wildlife, wildfires, recreation and industry. To scrap it for political reasons and without sound scientific evidence is a willful act of incompetence and irresponsibility. As a 5th generation Oregonian, sportsman, outdoorsman, farmer and conservationist I implore those that would abandon the BMP to consider the consequences to their career's and to the integrity of our public lands and so much more!
