Comments: I support Alternate 2 Proposed Action, however I do have the following comments:

In relation to new route development, please clarify what the process will look like for obtaining NHPA Section 106 compliance at areas not currently surveyed.

Please include language that shows that existing climbing areas and walls already have NHPA Section 106 compliance and are therefore open for further development.

Please describe the application process for new route development at NHPA Section 106 compliant areas.

Although it is not in the Project Area, a statement about open development in the remainder of the National Forest would be nice to include for clarity and future reference.

Thank you for your work on all of this - it is appreciated.
