Title:

Comments: I grew up in Wasilla, Alaska. All of my best childhood memories are from times when I was exploring Alaska's beautiful wild places. Whether it was the trees in my back yard or the forests in one of Alaska's many incredible public lands, being able to see and experience nature's wonder shaped who I am today. To whoever is reading this, you have the immense power and privilege to make sure that future generations of Alaskans can witness and experience some of the last remaining old growth forest on Prince of Wales Island. A love of trees and the ecosystems they support is something I know you and I have in common. Please protect Unit 346 and take it out of the Twin Mountain II Timber Sale before you sign the Record of Decision.

Scientists have observed and reported how important Unit 346 is for all the animals that depend on this forest. There have been seven denning structures found in and around Unit 346. Animals deserve to have their homes protected and you have the ability to make a difference in their lives by protecting Unit 346

Please remove Unit 346 from Twin Mountain II.

Sincerely,

Lilla Fortunoff
