Comments: I support the proposal to operate and maintain an organizational camp at the existing facilities in the Pinaleño Mountains for a 20-year period.

Organizational camps provide meaningful opportunities for outdoor recreation, education, and appreciation of our public lands. Continuing to use and maintain these existing facilities will help keep those opportunities available for future generations. A 20-year authorization also provides stability for long-term planning and responsible upkeep.

I encourage the Forest Service to approve this proposal while ensuring appropriate fire prevention, responsible maintenance, and protection of the surrounding natural resources. I believe this project represents a valuable and appropriate use of the existing facilities.
