Comments: I oppose this action as proposed, and I ask the agency to weigh the specific harms below.

I ask the agency to respond to each of the following issues in the record:
1. This proposal authorizes post-fire logging and vegetation management across 7,402 acres of the Wallowa-Whitman National Forest, and I oppose approving it without full public scrutiny of impacts to wildlife, fish, and rare plants in the affected area.
2. The Anthony, Olive Butte, and McCully fire areas deserve recovery plans that prioritize watershed protection and natural regeneration, not commercial forest products extraction.
3. Post-fire ecosystems on the Whitman Ranger District support wildlife and rare plants that need time to recover, and rushing logging operations under the guise of fuels management can cause lasting harm to these resources.
4. Oppose approving this project until the NEPA process fully evaluates how post-fire recovery activities across all three fire areas will affect recreation, watershed health, and rare plant communities on the Wallowa-Whitman National Forest.
