Comments: After elk hunting in the Sumter area, I have been pleased to see the road maintenance that has been done prior to the fires. I do not want to discourage the work that has been done and what I've seen so far however, we need to keep in mind that we do not need to limit access up to some of these remote areas as like the cracker Creek area and so many others that I enjoy for the snow season. The small surrounding communities depend greatly on winter recreation so this needs to be kept in mind and keeping winter access available is important for the community.
