Comments: We need to do better, and we can do better. One of the greatest things about Canada is out intouched spaces. People desperately need nature to feel good and be healthy. Better does not always mean building up. Sometimes better is stopping and just letting Earth care for herself and letting nature blossom. We need to protect these areas. There is too much development and not enough being left alone. We need the balance in our lives. Our kids need the balance for their future and own well being.
