First name: Andrew

Last name: Plant

Organization: Montana Mountain Bike Alliance

Title: Mountain Biker

Comments: Hello, I write this request to allow the continued use of remote trails by multiple user groups. I am mountain biker from Missoula and I have not had the opportunity to ride this trail. The friends that have can only say good things about what remote views are provided. Removing users like our group provides no benefit.

Remote wilderness like this will never be seen if the chopping block continues to eliminate groups and provide lenience to some with no particular reasoning. In all my time on trails I have seen one group provide outstanding stewardship and that is the effort of mountain bikers. Horsemen see no need to stop and fix something that can simply be trampled by their animal. Hikers have no impact and therefore will never need to clear what can be avoided. Bikers need trails that allow continued rolling and we will therefore put an effort in to create a better experience.

We just need support rather than a constant threat of bring excluded. Bring it together and let's keep everyone moving.
