I hereby submit my comments on your draft environmental assessment (EA) that would authorize helicopter use by the Arizona Game and Fish Department in Pusch Ridge Wilderness over the next ten years,

No!!! Please do not approve this plan.

Increased helicopter traffic in the Santa Catalina Mountains will significantly impact the experience of my family and friends' and my use of trails along Passages 11 and 12 of the Arizona National Scenic Trail, especially within a federally designated wilderness area, as well as along the many other trails in the area. I am also concerned about the lack of concern this proposal has for wildlife-in other words-driving more and more wildlife out of the area from the sheer terror of this nonsense. Lastly, this will be an offense to the quiet we enjoy in our home hear this area.

Thank you for considering my views.
