Comments: Helicopters in Pusch Ridge Wilderness

The use of any motorized equipment is strictly prohibited by law, e.g. The Wilderness Act of 1968(date?). The use of helicopters by AZ. Dept of Game and Fish sets a bad precedent for the future for any and all Federal, State or county land management agencies with compelling interests on the Coronado. The fact this matter of helicopters for bighorn sheep population reestablishment was not well vetted through the review processes before project approval only reinforces the notion that AZDGF is an inappropriate, if not incompetent partner, with Coronado NF management. Simply stated, do not allow helicopter access in the Pusch Ridge Wilderness, regardless of short-term benefits.
