Title:

Comments: No helicopters.

Please do not use helicopters in the Pusch Ridge Wilderness area. Rather than being helpful they will be frightening to wildlife and certainly intrusive and maddening to hikers and backcountry persons. We want the wilderness to be as wild and quiet as it possibly can be. Please use ground access, mostly without vehicles, and foot travel instead to monitor and observe. I hike there and seek the natural state of the area, quiet and wild. Thank you.
