Comments: public comment on federal register

the general taxpayer citizens of this country are not interested in making sure livestock have food on our national lands. in fact, we have asked over and over to throw them off our national land. look at Clive Bundy who hasn't even paid for use of our national land for 25 years. these robber baron cattle need to be out of our national forests. they are highly destructive. they call for killing of all wildlife and birds constantly and ask for poisons to be put down to kill them. many many us citizens ask for this land to be free from livestock. get them off our national land and do not spend a penny of our national tax dollars to make sure cows and cattle have food. that is the profiteers responsibility, not ours.

get the robber baron cattle off our national lands. they pay cheap cheap prices and destroy the land and bring on climate change. get them off. this agency is disgusting in trying to use our national tax dollars making sure profiteers have food for their livestock. that is their responsibility, not ours. you are cheating the general taxpayers of this country by your actions. this is a complaint for the public record. please receipt. jean public
