Last name: Smith

Organization: A CONCERNED AMERICAN

Title:

Comments: Please set aside ample space for non-motorized users of the National Forest!!!! Snowmobile use and non-motorized use are truly NOT COMPATIBLE on the same parcel of land. Non-motorized users seek a quiet, exhaust free, track free experience which they CAN NOT obtain when the land is also used by OSV's!!!

With global warming, less snowfall and the need to decrease the use of fossil fuels, why in the hell are we promoting the use of OSV's anyway???? Their use should be discouraged and eventually phased out in favor of healthy activities that do not burn fossil fuels and do not harm the environment.....it is time now to be sane and encourage the health of the planet and discourage the destructive, harmful and fully unnecessary burning of fossil fuels which promote global warming and environmental destruction!!!!

Please: let us be rational, healthy, work on saving the planet and decrease global warming!
