Comments: Noxious weed plan

Hello,

Site specific would be the Sunny Gulch campground where, 3 weeks ago, I spotted an employee spraying small amounts of Dalmatian (or Yellow?) Toadflax to no avail.

How about getting a group of volunteers together to hand pull where appropriate before it is too late? Compensation could be a week of parking (or however long) in one of the campgrounds. I, personally would love to participate in such an endeavor.

I have seen firsthand the devastation this weed can do to hillsides in Montana as far as the eye can see. It absolutely broke my heart to see this crop up in our beautiful SNRA.

Please keep me informed of future plans.

Thank You,

Mary Mills
