Title:

Comments: I object to the significant expansion of forest service lands available to OSV without more environmental impact studies.

Of specific concern are areas off Highway 4 including Pacific Valley area.

Other concerns are opening of areas off Highway 108 that were previously restricted.

I am a backcountry/XC skier and I recreate along both highway corridors a lot during the winter including overnight trips.

I do not have an objection to OSV use, nor do I fundamentally object to an expansion of OSV use.

I am surprised at this large expansion and I do not see how this is possible without possible significant adverse impacts to area resources.

I would like to see better public access to USFS studies as well as more precise maps of the areas that are being included for expansion.

Yours,

Clint Smitheman
