Title:

Comments: to whom it may concern.

I support your proposed plan per the maps I have reviewed online. There was some discussion at the last meeting in Bear Valley regarding the area known as "Bear Trap cabin area". On the printed map I was given that day as well as the maps have have studied online I don't see this area as being closed in the future to motorized use. This is a very well known riding destination by locals. It has a well marked road system in the summer to access and a central meeting place for those getting to this area in the winter via snowmobiles. From Bear Valley in is about a 20 to 30 snowmobile ride to get to. Over past 12 years that I have been going to this location maybe once or twice a year does someone make this trip via cross country skis or any other form of non motorized access.

thanks for all of your work on this project. Any question please contact me via email at rmancini@sleepworld.com or my cell at 408-892-1700
