Comments: When my husband and I go back to visit his family, one of our favorite activities is to visit the Cibola forest. Our friend takes us to his claims located on D3_5K1, D3_5K2, and D3_5K3. In the area, we pass homes and buildings. These areas do not seem suitable for consideration as wilderness areas. Recovery of minerals and gems seem to be a more productive use of the area. We are getting older and unable to walk miles. We would hate to lose access to this beautiful area because it becomes designated as a wilderness area.
