Subject: New Mexico's Wilderness expansion  
Comment/Questions:

The Forrest plan to change various areas of the Cibola Forest to Wilderness.

These areas have existing roads, Jeep trails, mines and structures which DO NOT FIT to be a pristine wilderness area and is not suitable for consideration.

My complaint is that closures will affect the traditional subsistence use of forest lands, wood cutting, hunting, fishing and pinon pine collecting, also recreational mining and hinder the use of the land by the public who are physically unable to hike for miles to enjoy the forest. Enough has already been set aside for those who wish to have that wilderness experience. Closing more land will have a negative effect on more people than it will help.
