Comments: Proposed Restriction of access to cibola area trails for mountainbikes

Dear U.S. Forest service and all those in authority of the decision to restrict mountainbike access to trails in the Cibola area and Albuquerque area, please hear the plea from our community to stop the restriction of mountainbikes from these already established areas where mountain bikes are allowed. This confiscation of trail systems for mountain bikers would be a huge impact to the mountainbike community as well as commerce for the surrounding areas that mountain bikers frequent because of these trails. I kindly ask you to reconsider removing these treasured trails from our list of riding spots. Mountain bikes mean a great deal to me and i would hate to see these trails be taken away as would thousands of other mountain bikers in the area. Thank you for your time.

Sincerely, a Texas resident that loves biking in New mexico and would be very disappointed to not be able to ride/spend money there when i visit
