Comments: comment regarding the wilderness designation to land you are considering.

I would like to give a general comment regarding the wilderness designation you are considering.

I am usually against all increases in adding acreage to the wilderness designation.

The wilderness designation always discriminates against those with disabilities as it prevents access using mechanical means such as a 4 wheel drive.

For this reason I believe adding further acreage to the wilderness designation is wrong and the wilderness designation should be modified to accept motor vehicles in a responsible way or the wilderness designation should be abolished.
