Comments: Protect the Cibola for future generations

Thank you for soliciting comments on the Cibola's ongoing inventory for lands with wilderness characteristics. It is of the utmost importance both to carefully document wilderness characteristics and to make management decisions to protect those characteristics for future generations.

Wilderness provides countless benefits, both for the forest ecosystem and for human visitors. Large untouched spaces are incredibly important-they provide opportunities for fully functioning ecosystems, create carbon sinks, and allow people to experience nature on a primal and often spiritual level. Recent scientific evidence is mounting for the strong effects of being in nature on human health.

Many areas in the Cibola clearly meet the required criteria to be considered wilderness, including areas in the San Mateo, Magdalena, Bear, and Datil Mountains. Please inventory these areas, as well as any other large roadless areas as comprehensively as possible. Protect these areas through the forest planning process and recommend these areas to Congress as suitable for permanent wilderness designation.

Thank you for considering my comments.
