RE: Atlantic Coast Pipeline Decision Objection

Dear Associate Deputy Chief Glen Casamassa;

As an intervener (F307747 on CP 15-54-0000) in the FERC process for the ACP and previous commenter to the NFS, I wish to object to the Record of Decision (ROD) for Atlantic Coast Pipeline Project through the George Washington and Monongahela Forests.

This is a terrible decision which goes against the ideals of the USFS and will allow a private for profit corporation to defile the GWNF, disrupt and pollute headwater streams with little, if any, regard for the environment or the water source for thousands of citizens of the Commonwealth of Virginia. It has been shown repeatedly that this pipeline is unnecessary, beneficial only to the share holders of Dominion Energy and poses a legitimate threat to the health and economy of those living along the pipeline route. The GWNF is unique and should be protected from corporate greed.

Sincerely,

Albert and Jane Morriss
