Subject: Atlantic Coast Pipeline

Dear Forest Service,

I am writing as a concerned citizen of North Carolina who does not want the Atlantic Coast Pipeline in our state. This pipeline, seizing people's private land by eminent domain in order to make a few wealthy people rich while destroying the climate and endangering people in its pathway, is just plain wrong! Eminent domain should never be used to benefit a corporation or individual at the expense of innocent people, who are at risk of leaks, explosions, fires, water contamination, and the damage of their beautiful mountains, being reduced to rubble with streams buried and poisoned. This and other pipelines carry fracked gas which devastates the communities in which it is mined, and the leaks and venting of methane wreak havoc on the climate.

It will create only a few temporary jobs but the damage is permanent.

Stop the pipelines!

Cathy Holt
