

Written Comment for the Incline Management Plan: We welcome and invite your written comments and input regarding the management of 1,138 acres of National Forest System lands off the Mt. Rose Highway (SR 431) above Incline Village, Nevada. The planning effort proposes project-specific activities to establish National Forest System standards for streams and habitat, recreation, road and trail management under the Lake Tahoe Basin Management Unit (LTBMU) Land Management Plan. The project also proposes a Forest Plan amendment to modify a portion of the project area from a general conservation management area to a backcountry management area. Please be sure to include your name and address. Your comments will be most helpful if they are specific as possible, telling us what you like or do not like and why. **Comments are due by the close of business on January 5, 2018.**

~~I know that~~ Once you destroy something in nature
it cannot be fixed.

~~I don't want~~

The swamps are very important parts to the environment and I do not want them to be removed or destroyed. I do not want any development of any kind permanently. Tahoe is a very beautiful place, ~~the~~ commercialization destroys her beauty. No motorized vehicles of any kind. You cannot improve nature

Florida used to be a very gorgeous place filled with swamps and clean lakes and priceless drinkable rivers, now that people have commercialized all of Florida, all of that beauty is destroyed.
