Subject: Incline Plan Management Project

Thank you for your presentation the other day.

My comments:

As long as the Backcountry assignment includes the caveat related to Winter use program NO MOTORIZED OVER THE SNOW VEHICLES or any time vehicles (dirt bikes) except for event parking I like the plan.

The east side of 3rd creek forest plan is ok because as such a designation it might allow a road or path to be made of X-Country skiing.

I like the removal of the artificially installed diversion dam on 3rd creek to Incline Lake as well as the restoration of that affected area to a more naturally occurring riparian environment.

My understanding is that upstream from the old lake there was an additional dam that gave way years ago. You might look at that area for natural restoration as well.

I volunteer for the Nevada State Department of Wildlife Fisheries Dept. If you are looking for help I'm old but crotchety!

Thank you
Steve Dolan
