Comments: Public Input for Potential Wilderness Area Report

Hello Ms. Boyle,

Please consider mountain biking as a primary use of the Coronado National Forest.

My husband, son and I currently live in southern California but return to Tucson several times each year to visit family. We always bring our mountain bikes so we can ride the trails in the Catalinas and around Tucson. Trail access needs to stay open to mountain bikers.

I would like to have my comments added to the public record.

I would like to be notified of future updates of Potential Wilderness Area reports.

Thank you,

Connie F. Valdez
