

Mr. Fitzwilliams:

As a longtime Beaver Creek retail owner, I've been serving on the Beaver Creek Economic Advisory Council for the past few years and am very proud of the work we've accomplished to make Beaver Creek a world-class place to work, recreate and live.

While our economic growth is very important, equal is our stewardship of the environment. As commercial and property owners, we are very fortunate to partner with Vail Resorts who are increasingly leaders in the space of all things sustainability.

That is why, I and the Beaver Creek Economic Advisory Council, wholeheartedly support the **Beaver Creek Resort - McCoy Park Terrain Development**.

Not only will the project bring a family-friendly ski experience to the mountain, but it creates a safe "bowl" away from the expert skiers and riders. With record skier visits in three of the past five seasons, I'm pleased to see these improvements that are within the resort's permit area and were accepted as part of the approved 2010 master development plan come to fruition.

Finally, I applaud the BC team for reconfiguring and preserving Nordic and snowshoe terrain. While underutilized currently, it is a special offering that makes Beaver Creek that much more one of a kind.

Thank you for reviewing and moving this project forward.

Sincerely,

Robert D. Boselli – Owner  
Beaver Creek Gear  
Generation BC  
Treasurer of the BC Merchants Association
