Comments: I oppose the new Western Colorado Congress GMUG Wilderness proposal!

Colorado has some of the greatest mountains and terrain in the country which allow for many types of multi-use access. As an avid hiker, fly fishermen, snowmobiler, OHV user and dirt biker I really appreciate access to these areas. In Colorado we have plenty of wilderness and road-less lands already designated -- please don't lock us out of our state lands and the avenues to enjoy it. As a backcountry motor-sports user, I am proud my OHV fees help maintain the land and keep areas open for all to enjoy.

Grand Mesa has always been an area to be used by the local residents and visitors. Let's make sure it remains that way. There are already over 3.5 million acres of wilderness in Colorado. Please help prevent these special interest groups like Sierra Club and the Wilderness society from closing access to our public lands. The recreation/OHV and outdoor use is vital to the economy of Grand Junction, Delta, Montrose and our surrounding areas.

Motorized access to these areas is very important to maintaining and managing these areas for everyone's use!

I oppose designating any additions lands in GMUG as special use/wilderness.

Thank you for considering my comments. Best regards,

Jon-Pierre Stoermer
