Title:
Comments: Longtime resident int he Gunnison valley who enjoys recreation, wilderness, and all the natural beauty the Gunnison Valley provides.

Mineral, gas, and logging withdrawal and development- Few areas have as diverse of natural resources as our area. I believe any withdrawal development in our area will damage the beauty, diversity, and reasons visitors and locals alike enjoy the Gunnison Valley.

Roadless areas- More wilderness and "wildness" is a necessary ingredient to see Gunnison Valley stay unique and a healthy ecosystem. Please see no new road development in our areas to ensure our water and wildlife stay healthy indefinitely.

Wildlife- ensure the long-term sustainability and health of our fish and wildlife which provide hunting, fishing, and wildlife viewing. Few ecosystems in our state or the west maintain the diversity and quality of the Gunnison Valley. Guture generations deserve to have this area and its wildlife remain in a natural state and not diminished by mankind's development.
