Please provide your written comments below:

The various grassland areas being considered for drilling need to be protected for citizens and not used for private/corporate profit. These lands were set aside for preservation of ecosystems and for respectful enjoyment; giving oil companies access to destroy these areas will result in irreparable harm. Once these lands are drilled into and destroyed, we will never get them back. I IMPLORE you to look at the long-term negative effects this will have on Texas rather than the short-term benefits of MONEY - money that will only go into rich company's pockets while leaving Texas depleted and ravaged. Once these areas are GONE, we will NEVER get them back!

Please provide your written comments below (use back if needed).
