East Beaver Allotment Drift Information 2007-2016

TOTAL KNF DRIFT= 132. Of those, 13 were never verified or reported to the KNF (In my original count I did not include these for a total of 119), 5 of the cows were found in Alex Hole which does not concern this project because it not connected to grazing on East Beaver. When a range was given I used the highest number. Also, on 9/17 it was likely these were mixed cows (i.e. not all KNF-permitted cattle, because our permittee only found 1 that was his).

Date 2010	# of cattle on RR-SNF	# of cattle from KNF	OKAR Page #	NOTE/Drift Location
9/3	? (KNF??)	Reported but unconfirmed	OKAR3231	Donomore, Glade Creek, and Siskiyou Gap area: we don't know how many or if this was even KNF cattle. When Permittee checked he did not find any cows.
9/5	Reported but unconfirmed	6 (RR-SNF)	OKAR3231	Donomore, Glade Creek, and Siskiyou Gap area. Permittee found no KNF cows on RR-SNF, but did find RR-SNF cows on KNF in Sheep Camp Spring area: pushed them back into Glade Creek.
9/24	15 (KNF)	/	OKAR3231	Studhorse- not within project area
10/12 (10/14 was when cows were moved)	26 (KNF) 20 (RR-SNF)		OKAR3232	Donomore (15), McDonald Basin(11). Do not count the 20 because they were RR-SNF cattle
10/17	?(KNF)		OKAR3232	McDonald Basin (?): KNF Permittee moved these cattle before McMorris even got the message.

TOTAL KNF DRIFT= 41, in my original count I did not count the 15 in Studhorse because it does not concern the East Beaver allotment. It is drift from Horse Creek Allotment (KNF) onto the RR-SNF. On 10/12 there were 20 cows spotted that were RR-SNF cattle on RR-SNF lands.

Date 2011	# of cattle on RR-SNF	# of cattle from KNF	OKAR Page #	NOTE/Drift Location
9/2		3 (KNF)	OKAR3218	
9/16	9 (KNF)	12 (KNF)	OKAR3220	Big Rock/Miller Glade area
9/17	9 (RR-SNF)	/	OKAR3219	RR-SNF cattle on forest boundary

TOTAL KNF DRIFT= 9. I did not add this to the brief originally because this is an incomplete sheet for 2011. The AR was brought together mid season and did not capture all of the 2011 monitoring. At the end of the year there were 3 additional occurrences. One occurrence was 12 cattle and no numbers were reported for the other occurrences.
