Hello there:

I'm a born-and-raised Juneauite; my husband and I recreate at the glacier year round, and I wanted to register my thoughts on the Forest Service's failure to address many of the concerns raised by Juneau residents in planning for the future of the rec area.

Any Forest Service plan should specify *no* expanded bus parking near the visitor center; *no* vehicle access close to the existing facilities; remote parking for cars and buses during the summer with an electric shuttle system to move people to the facilities; manage for the future with an eye on climate change, renewable energy and sustainability. Also any boats on the lake should be electric, NOT diesel. It seems so simple to keep this resource, which is melting literally before our eyes, safe. I implore you to take these basic steps.

Thank you,
Genevieve Gagne-Hawes
