Comments: Seriously???
how can ANYONE think developing this beautiful area MORE!? is a good idea??
Pull people away from this natural wonder!!

I support the idea of busing people in from a further away spot. Have folks hop on bus, get dropped off and bus disappears till it unloads more n picks them up.

NO motorized anything on the water....
do we have to have access to everything??
I have worked walking the trails which are handicapped accessible...have not seen a single wheelchair. I support ADA totally.
I believe it's in everyone's interest to BACK OFF. Do we need to tread everywhere??
Control numbers....it is NOT enjoyable to walk on trails with groups of folks that can equal 80 people @minimum.

Dumping more people, boats busses and pavement only degrades this natural area. Rethink. study, listen.
Nature is calling, not development.
