Title:

Comments: I am interested in participating in any resolution discussions between the objector(s) and the reviewing official for the following objection issues:

Geographic area land management direction for the Badger Two Medicine area, the Crazy Mountains, and the Continental Divide National Scenic Trail.

Motorized and/or mechanized recreation access and suitability determinations in recommended wilderness, primitive recreation opportunity spectrum settings, the Badger Two Medicine Area, and the Elkhorns Wildlife Management Unit.

Land management plan direction related wilderness, wilderness study areas, recommended wilderness, and inventoried roadless areas.

Areas recommended for wilderness designation.

Land management plan direction and use of best available scientific information for wildlife including:

- [bull] Elk and big game habitat and use of best available scientific information

- [bull] Viability of all native species recovery and conservation of federally recognized species (under the Endangered Species Act)

- [bull] Connectivity

- [bull] Identification of species of conservation concern

Land management plan direction and use of best available scientific information for aquatic and riparian resources, invasive species, livestock grazing, and climate change

Please provide a brief explanation of your interest in the objection(s) and any specific concern(s), including a description of your support or opposition to the objection(s):

I am a strong advocate for wilderness designation in central Montana. There are currently NO designated wilderness areas in central Montana, but there are numerous areas that qualify as wilderness.

Motorized and/or mechanized recreation access has no place in recommended wilderness, the Badger Two Medicine Area, and the Elkhorns Wildlife Management Unit.

I have a strong background in wildlife management including wildlife security provisions.

The lack of serious actions to arrest climate change, as currently understood by the best available scientific information, will affect even the best of land management plans going forward.

Please identify when you commented during the planning process (scoping, draft EIS, and/or final EIS):

I have been involved and have commented throughout each planning process step.
