Comments: My eMTB allows me to reach places that are otherwise inaccessible to me either due to stamina or time restrictions. It allows me to enjoy more of the forest without leaving a big footprint. My eMTB IS a bicycle. It's quiet and does not disturm the trail more than a purely human powered bicycle as demonstrated by an IMBA study (see attached).

Please allow eMTBs as on USFS trails as they allow more access without causing excessive harm to the trails. They are a wonderful vehicle that will aid many more people to access forests and discover how wonderful they are.
