Comments: This project (no matter how careful) negatively impacts our natural environment. This watershed is too important to be bargaining with for mineral gain. Don[rsquo]t let the big money have their way, it[rsquo]s the sole reason our earth and our species is being extinguished. The greed can[rsquo]t be allowed to win. There[rsquo]s only one salmon river drainage and if it[rsquo]s ruined, it[rsquo]s forever.

Please think about how this will affect my young children and their future in this area.
