

Dear Payette National Forest Staff,

Thank you for the opportunity to comment on Midas Gold Idaho's Alternative 2. Over the last several years, I've had the opportunity to hear a handful of presentations on the Stibnite Gold Project, sit down with project staff and observe how the company has lived out its mission as it has grown. It is with this knowledge that I encourage you to permit the Stibnite Gold Project.

What I like about Midas Gold's plan is that it offers solutions for damage caused by legacy operations and creates a brighter future for the site. For example, Midas is cleaning up old mining waste from projects dating back to the WWII era. I know that Alternative 2 is a holistic proposal that addresses existing issues and protects against their reoccurrence. Tailings are just one issue related to mining projects, and Midas is addressing them directly. Under Alternative 2, the company will construct a long-term storage facility for future waste from mining operations. The facility is designed to withstand an earthquake up to 6.5 on the Richter scale. I feel confident the company has considered multiple scenarios in the design, so it will be able to operate continuously with no problems in order to protect the environment.

Reviewing Midas Gold's plans it is clear to me the company really believes in taking care of the environment and keeping the community safe. I urge you to permit the Stibnite Gold Project using alternative two and keep this project moving forward. The comment period has been extended by 15 days once already, please keep the comment period to 60 days, so we can prevent additional delays.

Regards,

Name: William Reid
