

Dear US National Forest Service Staff,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of Midas Gold Idaho's comment period. I have been following Midas Gold Idaho's plans since they first came into our state, in large part because we have extended family that lives in Yellow Pine and want to see the best results for their community there too. The more I have learned about the project, the more excited I am about the possibilities for the future. I work as a After School Program Teacher in Riggins, Idaho and I'm excited to see more families moving back to our rural communities, and enjoy a better quality of life, but to keep those families it takes employment opportunities to help them provide for their families. I feel Midas Gold could really help make a difference for our local families!

All though the comment period for the project was already extended twice. I feel the U.S. Forest Service has given the public more than adequate time to comment, plus tools that make reviewing the document easy and a virtual meeting room to make information more digestible. It is with this knowledge that I encourage the U.S. Forest Service to continue to move the project forward and permit the site using alternative 2 as the guide.

The Stibnite Gold Project is the type of project our state needs. I highly encourage the U.S. Forest Service to permit this project, using alternative two presented by Midas Gold, as expeditiously as possible. There is no need to extend the comment period. Sixty days is plenty of time to comment and we need the benefits of this project now. Thank you for your time.

Yours,

Mrs. Teresa Mignerey

Riggins, Idaho
