

Good Morning,

I wanted to take a few moments to write out my support for the Stibnite Gold project.

My wife and I have taken significant time to learn about the Stibnite Gold project to better understand their plan. We have also been to the site ourselves and toured the site as it is today to see the damaged state the land is currently in.

The Stibnite Gold Project is a Winner for all parties involved. In fact, it would be a shame not to move forward with the project. The site today is a disaster. Myself and many others see this as a tremendous opportunity to reclaim the damaged land, mine for precious metals, create huge economic benefits for the state, and finally restore the site when operations are complete.

It would be a tragedy for the land and the community to let this opportunity pass. There will likely never be a better opportunity to address legacy mining damage (allowed before current Environmental regs were in place) while creating a net benefit for the community at the same time.

Thank you for reviewing my comments. I am grateful for the tools the Forest Service has provided to review the document and participate in this process. I urge you to hold Midas Gold accountable for the proper reclamation of the site and permit Midas Gold's carefully thought out plan as outlined under alternative two.

Regards,

Zac Shipman
