

To Concerned Payette National Forest Staff,

Thank you for the opportunity to comment on the Stibnite Gold Project as part of the U.S. Forest Service's permitting process. This is an important project for Valley County and will have a significant impact on the community. As someone who explores, plays and cares about this region of Idaho's backcountry, I want to make sure the Stibnite Gold Project is done the right way.

Alternative 2 is the result of many years of study by Midas Gold. The company developed this alternative after submitting their original plans and working with stakeholders, community members and environmental groups to try to determine how it could be improved. The result was a smaller project footprint, reconnecting salmon to their native spawning grounds before mining ever begins and improved water quality. Two of the alternatives, 3 and 4, would delay the project by several years and withhold its benefits from Idahoans unnecessarily. Those same alternatives could also become so expensive it could make the project cost prohibitive. With everything happening in the world, I feel strongly that we need to Stibnite Gold Project to move forward now. It would bring 500 well-paying jobs to rural Idaho, invest a billion in Idaho and help improve community infrastructure.

This Stibnite Gold Project is a huge opportunity for Idaho. I am grateful for the tools the Forest Service has provided to review the DEIS and learn more about the project. These tools have given Idahoans sufficient time to comment. Please permit alternative 2 and continue moving the project forward so our citizens can reap the positive impacts.

Thanks for your Consideration,

Name: Daniel Iliff
