

Ms. Jackson,

I am writing to express my full support of Midas Gold Idaho and the Stibnite Gold Project. Midas Gold has shown they are committed to Idaho and want to take care of the environment. I hope you move forward and permit this project as quickly as possible.

Midas Gold Idaho has been studying Stibnite for nearly a decade. During this time, the company discovered arsenic and antimony levels in the groundwater far exceed human health standards at multiple points across the site. Fortunately, the Stibnite Gold Project is designed to address this issue. In the company's Water Quality Management Plan, Midas can lower levels of arsenic and antimony in the river and cause concentrations to be lower than what we see at the site today (DEIS 4.9-70). Additionally, Midas Gold has comprehensive plans to help restore critical waterways and habitat for fish in this region. According to the draft EIS, an additional 26.5 km of habitat for anadromous salmonoids becomes available before mining even begins with the construction of the fish passageway around the Yellow Pine pit (DEIS 4.12). Alternative 2 would also provide a net gain of 11.1 km of intrinsic potential habitat for steelhead trout and 12.4 km for bull trout. These benefits should be fully recognized and supported by the U.S. Forest Service.

The Stibnite Gold Project is the type of project our state needs. I highly encourage the U.S. Forest Service to permit this project, using alternative two presented by Midas Gold, as expeditiously as possible. There is no need to extend the comment period. Sixty days is plenty of time to comment and we need the benefits of this project now.

Sincerely,

Name: Non Resident
