

DEAR MS JACKSON,

The company I work for has drilled at stibnite for several years on and off as needed . Midas gold has always had a strict policy that the drilling work is planned and completed with the lowest impact on water and land as possible. The company management has changed but their focus has not. We have worked with many companies in the 40 plus years of drilling Midas Gold is top notch . Midas Gold will mine and reclaim this site and leave it in better condition than they found it I am confident in that.

Sincerely Craig Loyson

Please feel free to call me 406 544 0623
