Title:

Comments: PLEASE do not allow electric bikes into our parks. Parks are important to us all to allow us to get into nature, escape the hustle & bustle of our lives. Biophilia is the term for the boost in happiness and comfort that comes from the experience of nature. Mountain bikes are already a huge nuisance and dangerous to other users but we are accepting that all park users need to share. Like Mountain Bikes, we anticipate that Electric bike riders will also find it easy to just go off trail, leaving tire tracks and ruining large blocks of natural lands, including protected plants and animal habitats. Electric bikes are just too far. Where do you draw the line? Shall we let motorcycles, ATVs in?

The park service has a mandate to protect the parks. This will tear up the terrain even more. Please vote no on this.
