Comments: As a third generation Idahoan I believe it is my duty to stop alteration of Idaho's public lands. I do not support Stibnite because there is no environmentally safe way to into the ground for gold. Its a utter lie that a mining company will produce longevity for Idaho. I would also like to request an extension for 120 days to fully complete the reading of the DEIS for two reasons. Reason one being I have not had enough time to read the DEIS because I have only been given 45 days for a draft that has taken years to write. Second, I want to spread the word even more than it already has to take action and stop further development of the Stibnite Mines.
