Subject: Re: Scattered Lands Project Update - Sandpoint Ranger District

public comment on federal register

i am oppose to this plan of logging. there is no justification for this attack on trees and tree life and wildlife life. you are taking away teh home and food sources of wildlife that needs this land desperately. i see no reason for ever using taxpayer dollars onj private land. not ever. i see no justification for logging. the fact is trees know what other trees they want near them and to just go in and log and then plant trees that humans want just does not work. it creates a dead world. state lands should be under state jurisdiction. i see no reaon to use national tax dollars to touch state lands. a state like california for example which wastes millniso of dollars on illegal immkigrant payments has plenty of money to pay for its own forets. it does not need to be a federal govt grantee when it has so much money but wastes it on foregin sneaking lawbreakers. i dont approve of logging. it is never a good activitiy. trees make oxygen for us to be alive. this kind of assault and attcvk desperately hurts our oxygen. it n egatively affects wildlife and oxygen and transpiration and wind and erosion. there is no need for this human assault on the environment. this commetn is for teh public record. please receiptp. ejan publiee [REDACTED]
