Comments:

Mr. Fitzwilliams, I have lived and worked in Carbondale since 1970. I worked for area ranchers and taught at the Rocky Mountain School. My wife taught in the public school system here also. Over these years we have created many working relationships, and many friendships. I will say with certainty that the advent of drilling and exploration here(the Thompson Divide) will only do damage to a thriving community. I can also say that all my friends will agree and that we are all working overtime to keep these interests out . Thanks for the chance give comments. Elliot and Caroline Norquist-Carbondale
