Comments: Comments on WRNF DEIS leasing plan

To the U.S. Forest Service

As the White River National Forest considers long-term plans for oil and gas leasing, you must protect our roadless areas and the Thompson Divide from oil and gas drilling. Oil and gas extraction including drilling, fracking, processing, and pipelines, threatens clean air, clean water, pristine and unfragmented natural areas, and valuable wildlife habitat in our forests and the health of nearby communities.

Please protect the beautiful White River National Forest. Western Colorado is doing its part!
