Comments: Allowing a project this large to take place at Holland Lake will entirely change recreating at Holland Lake. It will cause an even bigger influx of people and take away the opportunities local people have to enjoy our home. It will drive up costs in that area, create more traffic on the roads and trails and essentially ruin a place that my family has been enjoying for 30 years. It's already hard enough to find a camp site or space while recreating at Holland Lake and this will exacerbate the issue. Please consider the locals who want to be able to continue enjoying and recreating in our great state before pricing us out of everything here.
